SUMMARY

Through Global Minds Work Local, I'm exploring the frontiers of AI, SAAS/PAAS, Urban Resilience, Future of Work and financial innovation for Social Enterprise / Impact Investing. I help executives, senior leaders and innovators at growth companies leverage technology and process innovations to grow impactful, scalable and profitable businesses. Working with senior leaders and cross-functional teams at a broad range of companies, I discern trends in data, identify risks, develop strategies and implement plans to thrive in uncertain times.

As a mission driven capitalist, multi-dimensionally diverse thinker, team builder, leader and innovator with a passion for continuous learning and improvement, I've worked with companies of all sizes (from tiny startups to Fortune 50 and everything in-between). I leverage lessons learned as a military tactician, propulsion engineer, P&L manager, corporate strategist, speaker, facilitator, strategy consultant, entrepreneur and educator to help fast growing organizations and their customers achieve significant financial, operational and mission success.

CURRENT FOCUS

1. MISSION

Health, Wealth and Equality
